PAKEA designs and manufactures paper and composite cans production lines and equipment able to meet a large range of specifications and production capacities.

**Can bodies production lines**

- Using multi-layer laminating process to produce round or non-round, semi-rigid to rigid, low to high barrier pumpable paper and composite cans.
- Spiral wound can bodies production line with spiral or parallel labeling.
- SIRPAK® round and non-round linear continuous can bodies maker.
- PAKINA™ “ready-to-be-filled” round and non-round cans forming machine.

**Top or bottom cans closing machines**

- For pre- or post-filling closures, including paper units, plastic or metal unit, gluing, splicing, and winding. Features: paper, fibre, and production capacities.
- Cans closing and finishing machines PAKINA and MULTIPAK.
- Cans after-filling closing and finishing machine LCM.

**Benefits of our solutions**

- Precision
- High production efficiency
- Eco-friendly solutions
- Low operating and maintenance costs
- Economical and versatile production

**Paper tube spiral winding production lines**

- Un-winding systems from simple manual to fully automatic (incl. splicing).
- Gluing units from simple cascade to high precision ply spreading and angle parallelogram system.
- Spiral winders with 2 and 4 heads.
- In-line cutters from semi-automatic single knife to fully automatic multiple knives.
- Re-cutters manual, semi-automatic or fully automatic.

- PAKINA also supplies semi-automatic or automatic interleafing tube palletizing systems, tubes bundling and strapping systems.

**Edge protectors and paper profiles production lines**

- Un-winding systems from simple manual to fully automatic (incl. splicing).
- Cascade gluing units.
- Profiling machines.
- Laminating and cutting unit.
- Pneumatic or electric in-line guillotine cutter.

- PAKINA also supplies palletizing systems, recutters, notchers, and stacking systems for edge protectors and paper profiles.

**Fibre drums production lines**

- Semi-automatic and automatic round and square fibre drums production lines of various sizes.

**Special machines**

- Convolute automatic winders for fiber drum bodies.
- Textile tubes finishing machines to perform operations such as bull-nose, polish, groove, slit/slot and notching automatically.

**Eco-friendly solutions**

- Versatile production.
- Low operating and maintenance costs.
- High production efficiency.
- Economical and versatile production.
